European Integration and Political Conflict

Over the past half-century, Europe has experienced the most radical reallocation of authority that has ever taken place in peace-time;[5] yet the ideological conflicts that will emerge from this are only now becoming apparent. The editors of this volume, Gary Marks and Marco Steenbergen, have brought together a formidable group of scholars of European and comparative politics to investigate patterns of conflict that are arising in the European Union. Using diverse sources of data, and examining a range of actors, including citizens, political parties, members of the European Parliament, social movements, and interest groups, the authors of this volume conclude that political contestation concerning European integration is indeed rooted in the basic conflicts that have shaped political life in Western Europe for many years. This volume provides a comprehensive analysis of political conflict in the European Union that will shape the field for years to come.

GARY MARKS is Professor of Political Science at the University of North Carolina, Chapel Hill, and founding Director of the UNC Center for European Studies. Marks' recent books include *Multi-Level Governance and European Integration* (with Liesbet Hooghe; 2001), and *It Didn't Happen Here: Why Socialism Failed in the United States* (with Seymour Martin Lipset; 2000).

MARCO R. STEENBERGEN is Associate Professor at the Department of Political Science, University of North Carolina, Chapel Hill. His recent articles include "Measuring Political Deliberation: A Discourse Quality Index," *Comparative European Politics, 1* (2003): 20-48 (with Andre Bachtiger, Markus Sporndli, and Jiirg Steiner) and "Modelling Multilevel Data Structures," *American Journal of Political Science, 46* (2002): 218-37 (with Bradford Jones).

The evolving European systems of governance, in particular the European Union, challenge and transform the state, the most important locus of governance and political identity and loyalty over the past 200 years. The series *Themes in European Governance* aims to publish the best theoretical and analytical scholarship on the impact of European governance on the core institutions, policies and identities of nation-states. It focuses upon the implications for issues such as citizenship, welfare, political decision-making, and economic, monetary and fiscal policies. An initiative of Cambridge University Press and the Programme on Advanced Research on the Europeanization of the Nation-State (ARENA), Norway, the series includes contributions in the social sciences, humanities and law. The series aims to provide theoretically informed studies analysing key issues at the European level and within European states. Volumes in the series will be of interest to scholars and students of Europe both within Europe and worldwide. They will be of particular relevance to those interested in the development of sovereignty and governance of European states and in the issues raised by multi-level governance and multi-national integration throughout the world.

Other books in the series:

Paulette Kurzer *Markets and Moral Regulation: Cultural Change in the European Union*
Christoph Knill *The Europeanisation of National Administrations: Patterns of Institutional Change and Persistence*
Tanja Borzel *States and Regions in the European Union: Institutional Adaptation in Germany and Spain*
Liesbet Hooghe *The European Commission and the Integration of Europe: Images of Governance*
